

COLLECTION 4.0

RK EXCLUSIVE DOORS

My passion, your doors.

“Choose a job you love and you will never have to work a day in your life.”
Confucius

Each new day is a new challenge full of creative passion. A creative impulse comes from looking for inspiration in the beauty, in the details, framing elements in a crowded city or during a scenic bike ride. There is an unceasing desire for creating the future, interweaving, out of box thinking, implementing the impossible, and reaching the unattained...

This is how your door is created. What we offer to you is the effect of our passion and of the desire to create something exceptional, accoutred in top quality materials. Thus we provide you with what matters the most for you and your family: safety, yet enabling you to achieve the embodiment of the character of your interior – the interior of your home.

I have chosen the job I love. I have done it for you.
Owner - Robert Karasek

The advertisement is split into two main sections. The left section is a photograph of a modern building entrance at night. It features a large wooden door with a dark vertical panel on the left side containing the number '15' and a handle. The door is set within a recessed alcove with vertical wood slat walls. Above the door, a long, thin light fixture is embedded in the ceiling. To the right of the door, two potted snake plants sit on a stone-tiled platform. A set of stone steps leads up to the door. On the far left, a glass-walled interior is visible, showing a modern sofa and a small table. The right section of the advertisement is a solid black background. It contains the RK Exclusive Doors logo at the top right, a paragraph of descriptive text in the middle, and the 'COLLECTION 4.0' title at the bottom right, which is flanked by two horizontal red lines.

RK EXCLUSIVE DOORS

Let us delight you!

Stimulating, authentic, inspiring with all-pervasive aesthetics and perfection. Compromise free. Born out of passion. Focused on you. Combining modern technologies with comfort of use and sophisticated luxury. Changing each door opening into a moment of exceptional pleasure. Coping with the variability. Declaring prestige. Providing safety to the ones you love.

It was meant to be ideal. It was meant to be exceptional.

And so it is.
Just like you are.

The heart of the door

Each body is exceptional and unique, while the heart is what they all have in common – the heart is crucial, responsible for the strength and stamina of its holder. It determines everything. We know it, which is why we fit the RK Exclusive Doors with the best and the strongest hearts. They need to be matched ideally – absolutely the best ones.

We use top quality, innovative technology adjusted to your needs. We have a continuously growing portfolio of unique solutions developed out of concern for the environment and energy saving.

Profile systems

Our doors vary with different frames and insulation cores.

Depending on the door profile, their thermal performance also changes.

Our UD values were calculated according to DIN EN ISO10077-1, based on a door dimension of 1150 x 2250mm.

GLASS LINE

Glazing - adorable at first sight and infinitely irresistible. Smooth panes of deep black glass built the elite profile of each model from the GLASS collection. They do rule here. They are like a magnet, turning heads and breath-taking... their depth is simply irresistible. Shiny glass panes do not seem to be fragile; on the contrary, they seem to beam with impressive power!

You make stunning impression right from the start. Always.

As a rock...

We are experiencing a renaissance of concrete. It has entered architecture proudly and powerfully and seems to be indestructible and unconquerable. And rightly so. Its cool minimalism, sensual elegance and non-pushy design introduce style everywhere where it is applied. It is tamed barely by deep milling cutters sharply slitting the surface...

The effect? Impregnable.

Beautifully framed charm.

This statement represents the essence of this collection. These models incorporate all the best features and yet they flow with gentleness and subtlety. We have applied adorable refining by means of framing the major elements of the door leaf. The glazing of the interior of a recessed handrail is an additional detail reinforcing its elegance. Exclusive, refined and tasteful.

Created to be adored.

BASIC LINE

This line does not need additional setting as it is fascinating on its own. It is purposeful and consistent in achieving the goal. It is not striking or flashy. It meets the most important tasks and achieves a success. These models are masterpieces, free from extravagance, with solid and strong heart concealed beneath tasteful and soft setting. Unceasingly popular.

Impressive in its simplicity. They simply fit.

Invitation in English style.

Timeless elegance and chic, emphasized by sophisticated details. This door is a promise of a tasteful interior, beaming with family atmosphere. Come in, make yourself comfortable and have a lovely cup of hot tea. In this interior there is no room for chaos. It has been taken away. It is ruled by peace, care for culture and tradition, with love of the beautiful in the background.

You are always welcome here.

The art enchanted in a stain glass.

Classical style and elegance visible in the details. It is the details that shape the world that surrounds us. Elaborated stain glass is a perfect link between the styles.

Pure eclecticism. Invite style home.

ACCESSORIES

Automatic latchbolt

Simply allow the door to fall shut: as soon as the door is shut, the automatic latchbolts automatically throw 20mm and are secured to prevent them being forced back- the door is locked when just pulled shut. These locking systems can be opened at any time via the lever handle from the inside and by key from the outside.

Massive bolt (MR)

The GU-SECURY MR system provides you with a multi-point lock which is protected from being sawn through or forced back- with two or four MR bolts depending on the requirements.

Automatic double latchbolt

The particularly robust, self-locking system GU-SECURY Automatic 4 e.g. for house and apartment doors. Two MR bolts and two automatic latchbolts automatically throw 20mm when the door is pulled shut and are secured against being forced back.

The safe T-catch is easy and convenient to operate via the thumbturn

colours: EV1 silver, white, stainless steel

Safe -T-catch activated from the inside

From the inside activated thumbturn can be deactivate outside using the key

Double bolt (DR)

The GU-SECURY DR multi- point lock roll-Is the benefits of the SH (Hook bolt) and MR bolt into one double bolt. The lock geometry allows the same frame locking elements used with the GU-SECURY Automatic 4 system (with Automatic double latchbolt) to be used.

GU-SECURY

GU-SECURY Automatic safety:

Just put the door shut - automatically without closing –so comes into force the multi-point lock with 20mm throw. Two latching deadbolts will be automatically bolt and blocked from being pushed back. Just today comes a major technical advance in the perfect safety features of entrance doors.

Do you want your front door to be freely accessible by day? The GU-SECURY Automatic TE system enables you to manually override the automatic locking function so the door is released during the day.
